

AeX Inventory Viewer

The AeX Inventory Viewer is a Windows application based on the Microsoft .NET Framework 1.1. The primary function of this program is to present inventory data that has been created in advance by an Altiris client and stored on a local hard disk. This data consists of NSI files that conform syntactically with XML format and which may exist, at present, in two different versions. Both versions will be recognized and presented.

Benefits

Benefits when using the AeX Inventory Viewer:

- Support of both old and new NSI formats (replacement for the AeXNsiViewer.exe and AeXNsiViewer6Plus.exe).
- In standard mode: Presentation of pre-defined Altiris inventory data on the client (configurable via an external control file).
- In admin mode: Representation of all inventory classes and their contents.

System prerequisites

- Windows 2000 SP4 or later
- Microsoft .NET Framework 1.1 or later
